A B E R D E E N.**WEIGHTS, &c. used in ABERDEEN.**

The Scots Troy standard weight (tho' the ancient legal standard weight of Scotland) is not now in use; but in place thereof, the English Troy of 30 grains to the drop, the Averdupois and Amsterdam weights are used, viz.

Amsterdam—meal, 8 stone. coals, 36 stone per boll; honey 5lb. per pint; salt, 16 lb. per peck; fleshes, butter, cheese, tallow, hogs-lard, wool, 16 lb. per stone—in whoselale 112 lb. averdupois for the hundred weight, feathers, 23 lb. averd. per stone; downs, 16 lb. averd. cheese and butter, 28 oz. averd. per lb. though in some parts of the county 26 oz. in others 22 oz. only.

Of LIQUID measures, the town's standard is by the Stirling quart, pint, &c. jugs; the pint contains of water, 3 lb. 12 oz. : 2 dr. averd.—for measuring wine, ale, &c. a tin pint stoup, containing of water to the pap 3 lb. 15 oz. averdupois.

Of DRY measures the town uses a firlo, which contains 34 Stirling jug pints of water, for measuring bear, oats, and malt, also a firlo containing 26 Stirling jug pints of water, for measuring rye, pease, beans, meal, seeds, &c.—potatoes and turnips, 35 lb. english;—lime, 128 Stirling pints per boll.—cinders, 128 lb. per barrel.

Of measures of LENGTH, the town uses a plaining ell, containing 38 five twelfths english inches, and the english yard of 36 english inches.

The Aberdeen FIRLOT for wheat, rye, pease, beans, meal, and seeds, is equal to 1 firlo, 4 pints, 3 mutchkins Scotch standard measure.

The above boll is equal to 5 bushels, 1.916 cubic

inches English standard measure, and is 22.353 per cent. better than Scotch standard.
